Please find below and/or attached an Office communication concerning this application or proceeding.

		Application No.	Applicant(s)
Office Action Summary		09/590,831	SARTORE ET AL.
		Examiner	Art Unit
		Rehana Perveen	2182
The MAILING DATE of this communication appears on the cover sheet with the correspondence address			
Period for Reply			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).			
Status			
1)🖂			
2a) <u></u> ☐	This action is FINAL . 2b)⊠ Thi	is action is non-final.	
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is			
closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213. Disposition of Claims			
4)⊠ Claim(s) <u>1-20</u> is/are pending in the application.			
4a) Of the above claim(s) is/are withdrawn from consideration.			
5)□	Claim(s) is/are allowed.		
6)⊠	Claim(s) <u>1-20</u> is/are rejected.		
7)⊠	D⊠ Claim(s) <u>20</u> is/are objected to.		
8) Claim(s) are subject to restriction and/or election requirement.			
Application Papers			
9) The specification is objected to by the Examiner.			
10)⊠ The drawing(s) filed on <u>09 June 2000</u> is/are: a)⊠ accepted or b)⊡ objected to by the Examiner.			
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).			
11) ☐ The proposed drawing correction filed on is: a) ☐ approved b) ☐ disapproved by the Examiner.			
If approved, corrected drawings are required in reply to this Office action.			
12) The oath or declaration is objected to by the Examiner.			
Priority under 35 U.S.C. §§ 119 and 120			
13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:			
1. Certified copies of the priority documents have been received.			
	2. Certified copies of the priority documents have been received in Application No		
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. 			
14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).			
a) ☐ The translation of the foreign language provisional application has been received. 15)☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.			
Attachment(s)			
2) Notic	e of References Cited (PTO-892) e of Draftsperson's Patent Drawing Review (PTO-948) nation Disclosure Statement(s) (PTO-1449) Paper No(s) <u>2</u> .	5) Notice of Informal F	(PTO-413) Paper No(s) Patent Application (PTO-152)

Art Unit: 2182

Part III DETAILED ACTION

Claim Objections

Claim 20 is objected to because of the following informalities: claim 20 is a duplicate of claim 16.
 Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, claim 3, in lines 1 and 2, recites the limitation 'said electrical disconnection/reconnection'. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 2182

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dischler et al, patent no. 6,311,287.
- 6. As to claim 1, <u>Dischler et al</u> teach a peripheral device connected to a host device (figure 1), wherein a speed of the host device is adjusted in response to one or more predetermined conditions (abstract and col. 2 lines 17-37).
- 7. It is noted that Dischler et al do not expressly teach adjusting the speed of a <u>peripheral device</u>. Dischler et al teach adjusting the speed of a <u>host device</u>. It would have been obvious for one of ordinary skill in the art at the time of the invention to modify teachings of Dischler et al

Art Unit: 2182

to utilize the device speed adjustment technique into a peripheral device since such utilization would have enabled a peripheral device to run at optimal speeds.

- 8. As to claim 2, Dischler et al teach the device is configured to electrically disconnect (idol state) and reconnect (active state) at the adjusted speed to another device (col. 8 lines 44-56).
- 9. As to claim 3, Dischler et al teach the electrical disconnection/reconnection comprises re-enumeration of the device (inherent during operating conditions considerations process, col. 2 line 17 col. 3 line 15 and col. 10 lines 19-21).
- 10. As to claim 4, It is noted that Dischler et al do not expressly teach the device being a USB device. However, it would have been obvious for one of ordinary skill in the art at the time of the invention to employ the speed adjustment technique to a number of different types of devices (Dischler et al, col. 8 lines 5-11) including a USB device

Art Unit: 2182

since such technique would have enabled the prior art USB devices to run at optimal speeds.

- 11. As to claim 5, Dischler et al teach the one or more predetermined conditions comprise one or more speed considerations and one or more power considerations (abstract and col. 2 lines 18-38).
- 12. As to claim 6, Dischler et al teach the device is further configured to determine a required speed of the device (col. 6 lines 31-37).
- 13. As to claim 7, Dischler et al teach the device is further configured to determine a power conservation of the device (col. 4 line 54 col. 5 line 4).
- 14. As to claim 8, Dischler et al teach the device is further configured to switch from a first speed to a second speed in response to the one or more predetermined conditions (col. 6 lines 12-15).

Art Unit: 2182

- 15. As to claim 9, Dischler et al teach the device is further configured to switch from a first speed to a second speed in response to a user input (col. 6 lines 12-19).
- 16. As to claim 10, Dischler et al teach means for detecting a current operating speed of a device, and means for changing the operating speed of the device in response to one or more predetermined conditions (abstract and col. 2 lines 18-38).
- 17. It is noted that Dischler et al do not expressly teach the device being a peripheral device. Dischler et al teach adjusting the speed of a host device. It would have been obvious for one of ordinary skill in the art at the time of the invention to modify teachings of Dischler et al to utilize the device speed adjustment technique into a peripheral device since such utilization would have enabled a peripheral device to run at optimal speeds.
- 18. Claims 11-20 are directed to the method of system claims 1-10. Dischler et al teach the system as set forth

Art Unit: 2182

in claims 1-10. Therefore, Dischler et al also teach the method as set forth in claims 11-20.

19. Further references of interest are cited on Form PTO-892 which is an attachment to this office action.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

or faxed to:

(703) 746-7239, (for formal communications intended for entry)

Or:

(703) 746-7240 (for informal or draft communications, please label "PROPOSED" or "DRAFT")

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington. VA., Fourth Floor (Receptionist).

20. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rehana Perveen, whose telephone number is (703) 305-8476. The examiner can normally be reached Monday through Friday from 8:00 AM - 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey Gaffin, can

Art Unit: 2182

be reached at (703) 308-3301. The fax phone number for this Group is (703) 746-7239.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 305-3900.

Rehana Perveen February 6, 2003
